The course runs over three academic years. Year I and II prepares candidates for the Intermediate Examination and Year III for the Final Examination.

A Certificate in Housing Management issued by the Department of Extra-Mural Studies, University of Hong Kong, will be awarded to a candidate on passing the Final Examination and on producing evidence of having had at least two years' approved experience in housing management work.

# Art and Design

*Staff Tutor in Charge:* Jon A Prescott, B. Arch (Liv.); M.C.D., A.R.I.B.A., A.M.P.T.I.  
*Telephone No.* 226613

The courses in Art & Design are primarily planned to give a balanced basic visual education (both practical and theoretical) on which subsequent study can be soundly based.

Commencing this year, the previous Pre-Certificate training, consisting of one term of 12 weeks will be extended to encompass a full academic year of 27 teaching weeks and this will be regarded as a FOUNDATION YEAR with, as a consequence, the vocational elements of the three year Certificate Course restricted to the two final years. Students will be given introductory talks on the vocational aspects of the Design Courses, which can be undertaken within the somewhat limited means at our disposal. The object of even the vocational aspect of these programmes is to provide a general rather than a particular study so as to open students' eyes to the wider opportunities rather than to provide a narrow specialism in terms of design.

It is emphasised that Design cannot be practised in a vacuum or without a full technical understanding of the media involved, and the inclusion of specific courses in for example technological subjects, or in management and costing techniques, is essential for students wishing to put their more intuitive skills, and their understanding of form and colour, to practical and business use.

The Integration of Design skills into the Management and Industry of Hong Kong is one of the present great needs of the community; and the courses are envisaged as being of practical use in helping to meet this requirement.

Art & Design Courses are arranged so as to be available on a Liberal Studies basis for the general student.

Owing to the limitations of space and in the interests of good teaching the numbers accepted will be limited, with priority, of course, given to Certificate Students over those wishing to attend individual courses in isolation.

### *Course Syllabuses and Examinations*

Each complete Certificate Course covers three years. A year consists of two unequal length terms, the first of 12 weeks and the second of 15 weeks, making a total of 27 weeks in all. In courses which are predominately studio orientated, the work produced during the terms plus any vacation period tasks will be assessed as a whole at the end of each year by an Examining Board, consisting of the Advisory Panel and Course Tutors as relevant. Certain subjects will be examined by written papers.

Detailed requirements for written examinations will be made known as the course proceeds and adjustments in the syllabus and requirements may be made from time to time at the discretion of the Director of Studies and the Board.

After completion of the initial year the student will select one out of the three present streams of Fine Art, Advertising Design or Interior Design, and will take the lecture series and studio sessions which have been grouped so as to provide a scheme of systematic study leading, over two years, to the Certificate in Art and Design. The choice of streams may well be eventually enlarged by adding other subject areas as this becomes possible.

### *Entry Requirements*

Evidence of a good working knowledge of English is an essential for most Certificate and other courses in Art & Design. In view of the few facilities in schools to make Art a subject for the Hong Kong or London Certificate of Education, Ordinary or Advanced level, no formal requirements in these subjects are made for entry to the Certificate Course. A sound general education up to Ordinary levels G.C.E. and compliance with the age requirements for Extra Mural enrolment, (18 years minimum), is necessary.

Candidates will be selected by interview and mature students will be admitted on evidence of interest or professional involvement without necessarily possessing G.C.E. passes.

It is only fair however to point out to candidates who wish to follow further courses of study, in for example the United Kingdom, that a minimum entry requirement of 5 "O" level passes plus 2 "A" level passes or 3 "A" level passes plus evidence of a good general educational background represent minimum standards for entry to 1st Degree or equivalent level courses in Art & Design overseas and for which a good portfolio from our Certificated; Foundation type, course might provide a background for entry.

#### ***Materials and Equipment***

All students will be required to have a portfolio (size 35" x 25" min.) for storage of studio work during the term. This is particularly important as *all* work is required for the examination at the end of each year. Facilities are provided adjacent to the studios for storing these on the premises to save constant transportation of a bulky item. In addition students will be required to purchase:

- A double elephant size T square
- A double elephant drawing board (for home use)
- 45° and 60° set squares
- Drawing, scales, instruments and pens (a basic minimum only)
- Brushes, acrylic or oil paint, poster paint, water colours, pencils, etc. as required
- Drawing paper of various types.

Advice will be given on equipment needed prior to the commencement of each course and students should wait until they have been so briefed before they purchase, to avoid buying needlessly complex or expensive equipment not required by the tutors or lecturers.

A retail shop is open on the premises for the convenience of students at times suited to the lectures and studio periods, so that purchases can be made during the time of instruction as required.

#### ***Acknowledgements***

The department and director of art and design studies would like to thank the under-mentioned for their generosity in donating equipment & material for the courses.

The British Council	14 Fine Art Prints by eminent British Artists.
Messrs Jackson Wain & Harper	A flatbed proofing press
Spence Robinson Architects	A large number of bound volumes of periodicals for the Design Library.

#### ***Fees:***

The course fee for the Foundation year will be \$550  
The course fee for Years II and III will be \$450

Fees are to be paid in advance. Registration will be accepted for a *whole year* only.

Examination fees are extra, payable in advance.

An understanding of the structural framework of the human form, through a knowledge of basic anatomy is essential for all practising artists. Dr. Vaughan's course will provide a sound general background with instruction moving from consideration of overall aspects to detailed analysis of individual limbs and parts of the whole body – both in repose and in movement.

This course will *not* be a medical anatomy; bone structure, muscles and bloodvessels only being introduced in relation to their significance for the artist. Dr. Vaughan has considerable experience in illustration and is himself a painter. Students will spend a proportion of their time drawing from a model.

Aesthetics is usually considered to be the study of beauty in art, but as standards of beauty have altered through history, it might more broadly be defined as the study of the rules that make art "Art". Accepting the idea that there are laws of perception, as well as ideals of proportion, contrast and harmony – which even the most apparently "formless" and "meaningless" modern art acknowledges by rebelling against them – this course seeks to examine these underlying rules as they apply to the visual arts. Through lectures, slides and discussion the course will attempt to awaken those with little previous background or training to the rational basis of art and equip them with a set of standards to use in judging for themselves the merits of works of "pure" or applied art.

---

**HISTORY OF ART I INTRODUCTORY COURSE** Cesar A. Guillen Nunez, B.A. (Hons.) Courtauld Institute of Art, London University. *Commencing in January 1970.*

43

Mr. Tam is a talented and lively contemporary painter in the Chinese manner who derives great strength from the traditions which he knows so well.

The division of time in this course will be such as to allow the earlier lectures of the series to be devoted to the technical problems related to materials, basic elements and composition of Chinese painting, as a prelude to the understanding of its history. Important theories of early masters and their influence, the systems of classification, the greater influence of certain 'masters' and a pictorial analysis of their painting will be related to this early technical analysis and to a weekly exercise, the criticism of which will form a basis for discussion to give the student a deeper understanding of the achievement of the past and its vitality as a basis for today's work.

The course will be illustrated both by actual paintings or reproductions and slides.

---

## VOCATIONAL: Interior Design

"The profession of interior design has had a long struggle to free itself from the image of the interior *decorator*."

Like all creative work, interior design depends on an understanding of the principles and disciplines which can be scientifically outlined but it depends on something more – an intuitive element without which the results can be sterile.

The courses provided over two years introduce to students a scientific attitude to design and although the lecture series are independent they will be correlated to form a whole.

### STUDIO

Studio periods will form an essential part of the Interior Design courses when exercises will be discussed. In the studio all aspects of the work coalesce and for this reason such work is perhaps the most important part of the instruction and, for Certificate Students, the subsequent portfolio examination.

---

- 
- 44** **INTERIOR STUDIO II** Ruth H. Addison, Dipl. Arch (U.C.L.) A.R.I.B.A. *Thursdays 6.00-8.00 p.m., starting 25th September, 1969.* Extra Mural Town Centre. 12 meetings. Continuing Term 4 for a further 15 periods. *Fee \$70 (12 periods) \$90 (15 periods) \$150 (27 periods).*

A series of graded exercises will be set throughout the year in co-ordination with studies in various lecture courses\*, organised so as to develop the student's ability to present a carefully worked out scheme for differing types of interior. Part of the work this year will be to develop technical drawings in association with the lectures in the nature of materials and detailing and these will be worked out in conjunction with certain schemes of the student's own design.

\* See courses nos. 46 and 47

- 
- 45** **INTERIOR STUDIO III** Jon A. Prescott, B. Arch., M.C.D., A.R.I.B.A., A.M.T.P.I. *Fridays 6.00-8.00 p.m., starting 26th September, 1969.* Extra Mural Town Centre. 12 meetings. Continuing into Term 6 for a further 15 periods. *Fee \$70 (12 periods) \$90 (15 periods) \$150 (27 periods).*

More advanced Studio facilities will provide further selected exercises for students having previous knowledge and experience. Emphasis will be placed on the achievement of good design solutions within the practical limitations imposed by economics and material availability as well as on the achievement of imaginative esquisses.

- 
- 46** **THE NATURE OF MATERIALS AND DETAILING** Ruth H. Addison, Dipl. Arch. (U.C.L.) A.R.I.B.A. *Thursdays 6.00-8.00 p.m., starting 25th September, 1969.* 12 meetings. Continuing in Term 4 for a further 15 periods. *Fee: \$100 (12 periods) \$140 (15 periods) \$220 (27 periods).*

In all design work an understanding of the nature of the materials used is fundamental. The essential characteristics of materials predominantly used in interior work will be discussed and problems of achieving satisfactory jointings and junctions, the structural implications of using different materials and the effects to be achieved by different methods of detailing, will be co-ordinated with various exercises. Application of this data will be made in the studio work.

- 
- 47** **TECHNICAL SERVICES** R.A. Callow P.I.S., Dip. Arch. (Leics), F.R.I.B.A. and J. Burfield Architekt S.I.A., Dip. Arch., A.R.I.B.A. *Mondays 6.00-8.00 p.m., starting 22nd September 1969.* Extra Mural Town Centre. 12 meetings. Continuing into Term 4 & 6 for a further 15 periods. *Fee: \$100 (12 periods) \$140 (15 periods) \$220 (27 periods).*

Interior Design is inseparably bound up with the problems of effective integration of various technical services, the existence of which is nowadays assumed. Ventilation, air conditioning, lighting, electrical circuiting, plumbing, telephone installation and so on. These lectures will cover basic principles of the different installations so that the designer understands the problems involved and can discuss intelligently the detailed requirements with the various services engineers involved. Standards and legal requirements will be explained.

- 
- 48** **PROFESSIONAL PRACTICE IN INTERIOR WORK.** *Commencing January, 1970.*

A course covering professional attitudes, arrangement of contracts, relationship with contracting work and cost analysis of work.

---

---

**THE NATURE OF MATERIALS AND DETAILING II** John Burfield Architekt S.I.A. Dip. Arch., A.R.I.B.A. & R. Zung, *Tuesdays 6.00-7.30 p.m., starting 23rd September, 1969.* Extra Mural Town Centre. 12 meetings. Continuing into Term 6 for a further 15 periods. *Fee \$70 (12 periods) \$90 (15 periods) \$150 (27 periods).*

49

A continuation of instruction in the nature of basic materials and their manufacturing, jointing and structural implications to the designer. Special emphasis will be given to interior fittings and furniture with consideration of ergonomics and the effects of design for machine and serial production on the detailing of furniture.

---

## VOCATIONAL: Advertising Design

### STUDIO

Studio periods form an essential co-ordinating element in the advertising courses, where all aspects of the work coalesce. For this reason such work is perhaps the more important part of the instruction and, for certificate students, the subsequent portfolio examination.

---

**ADVERTISING STUDIO II** Julian A. Losinski, M.S.I.A., N.D.D., Dip. A.D.D. & A.D. *Mondays 6.00-8.00 p.m., starting 22nd September, 1969.* Extra Mural Town Centre. 12 periods. Continuing into Term 4 for a further 15 periods. *Fee: \$150 (27 periods).*

50

Studio facilities provide the core of the Advertising Design students work bringing together all aspects from printing technology to abstract formal considerations. As, however, advertising relies very greatly on "ideas" as well as Graphic Design it is important to appreciate what ideas mean, why they are good, how to get and exploit them. Within the framework of a series of carefully conceived exercises the student will apply ideas, in terms of layout, copy and photographic application for both advertisement and packaging designs.

---

- 
- 51** **ADVERTISING STUDIO III** Henry Steiner, M.F.A. (Yale) *Tuesdays 6.00-8.00 p.m., starting 23rd September, 1969.* Extra Mural Town Centre. 12 meetings. Continuing into Term 6 for a further 15 periods. *Fee: \$150 (27 periods)*

More advanced studio facilities will provide further selected exercises for students having previous knowledge and experience. Emphasis will be placed on the achievement of good design solutions within the practical limitations of administrative and economic considerations. The demonstration of various production techniques will be invoked in the solutions to the different problems set.

- 
- 52** **PRINTING TECHNOLOGY** Mr. R. K. Cheng B.A. (Econ.) St. Johns. Tech. Cert. in Printing C. & G. London. *Thursdays 6.00-7.00 p.m., starting 25th September, 1969.* extra Mural Town Centre, and Government Printing Works. 12 meetings. Continuing into Term 4 for a further 15 periods. *Fee: \$150 (27 periods).*

Most of these lectures will take place on the workshop floor so that students can become familiar with the practical problems of printing technology. They will provide a study in some depth of the features of printer's type, his type case, type setting and justification, point systems and classification, preparation of copy, casting off of copy, page layout, composition, paper and paper calculation, lino types and monotypes, etc. The study will be closely co-ordinated with studio exercises provided in Course No. 50. Non Certificate students will be particularly welcome.

- 
- 53** **PROFESSIONAL PRACTICE IN ADVERTISING** *Commencing January 1970.*

A course covering professional attitudes, arrangement of contracts and costing analysis of work.

- 
- 54** **BASIC PHOTOGRAPHIC TECHNIQUES & ILLUSTRATION I** Albert Hill, J.A. Dip. *Tuesdays 6.00-8.00 p.m., starting 23rd September, 1969.* Dark Room, 412 Asia House, 1 Hennessy Road. 12 meetings. Continuing into Term 4 for a further 15 periods. *Fee: \$90 (12 periods) \$100 (15 periods) \$170 (27 periods).*

The cost of Dark Room materials only is included in the fee. Drawing and other materials will be provided by the student.

An introductory course to this wide subject. The usefulness of the camera will be demonstrated in relation to the use of graphic art material, basic photographic method and processing. A brief historical symopsis will be given. Transparencies, photo composition, typography and use of the camera for documentary work will be discussed.

Students should be prepared to provide themselves with a camera of the single lens reflex type with interchangeable lens mounting. The tutor will provide a criticism of different makes relative to the work to be undertaken in the initial lecture.

---

55

The cost of Dark Room materials only is included in the fee. Any addition material required will be provided by the student.

The course will be a continuation of that provided by course no. with emphasis on film and papers used by the blockmaker and the relationship of camera techniques with work in the Graphics Arts.

Assignments will be set and a camera of the type described above course no. will be essential.

---

**PROCESSES OF PRODUCTION** Patrick W. Printer, M.S.I.A., N.D.D. and a panel of lecturers. *Mondays 8.00-9.30 p.m., starting 22nd September, 1969.* Extra Mural Town Centre. 12 meetings, continuing into Term 6 for a further 15 periods. *Fee: \$70 (12 periods) \$90 (15 periods) \$150 (27 periods).*

The aim of the course is to improve the student's grasp of idiomatic English through exercises in advanced comprehension and interpretation. It will involve wide and careful reading, including books and cyclostyled material, of varied styles and content-matter. This will develop the student's ability to read deeply and critically. Comprehension will be of two types: the writing of a precis after intensive study of a passage; and the answering of brief questions after rapid reading of a prose passage on a general topic, as training in quick assessment of essential points. The material used will include articles from newspapers or

periodicals on social, political and economic themes. Essay work will involve writing explanations and reports on the basis of information supplied, the purpose of this being to expand the student's ability to write clearly and logically in a given set of circumstances familiar to him.

On completing the course students may sit the examination leading to the Certificate in Advanced Use of English.

# European Languages

*Staff Tutor in Charge:* D.J.H. Macintosh, M.A. (Cantab) *Telephone No.* 468161 *Ext.* 304

The European language programme, taught in English, offers continuous study of any one such language over a period of two or three years. At the end of that time, a student with no previous knowledge of the language chosen should, if he has done the work recommended by the tutor (which should not be less than three or four hours a week in addition to classwork) have a competent command of the spoken and a basic knowledge of the written language.

Each sessional course is by itself a self-contained unit. Students should therefore enrol at the level appropriate to their knowledge of the language.

A good standard of English is essential for admission.

## FIRST YEAR COURSES

These sessional courses are intended for beginners. The aim is to give students the facility and confidence to express themselves orally and to understand simple daily conversation in the language, while sufficient attention will also be given to building up a basic written vocabulary, and to basic grammar.

Mr. T.P. Byrnes, A.A.I.A., M.C.P., Lecturer in Planning, University of Hong Kong  
*Tuesdays 6.00-8.00 p.m., starting 23rd September, 1969.* Extra Mural Town Centre.  
10 meetings once weekly. *Fee: \$55*

Decisions made in the field of Urban or Rural planning, which are of fundamental importance in the creation of the environment in which we live, are frequently incomprehensible to the average citizen even should he be fully aware of them before their effect is manifested in physical reality.

This situation for example in the United States has resulted in the appearance of a form of intermediary, a professional 'advocate planner' whose prime purpose is to advise and explain from a non official, but informed, level the significance of planning proposals at their formative stages. The importance of the awareness of what is planned by the general public as well as the property owner and developer, and even his participation in the decision making processes of Planning will be discussed, in the course of this series of talks.

The structure of Hong Kong's planning machinery will be examined, and conclusions drawn on the effectiveness of the relationships existing at present.
