The background features a soft, muted landscape with a range of mountains in the distance and a willow tree branch with small, dark buds hanging down on the right side. The overall color palette is a mix of light beige, tan, and muted green.

Visual Process

- ❖ Visual elements are manipulated simultaneously unlike words
- ❖ It's a right brain thing
- ❖ 30% of the brain cortex is devoted to visual processing (3% for hearing)
- ❖ Brain registers a full-color image (megabyte of data) in a fraction of a second
- ❖ Linked with text, messages are dual coded
- ❖ (Remember the impact of transferring to non-picture books?)
- ❖ <http://www.csuohio.edu/history/japan/japan01c.html>

Stegosaurus

Precision: Image vs. Words

- ❖ Draw an elephant.
- ❖ Draw a *Vombatus ursinus*.
- ❖ If you don't know what it is, can you draw it?
- ❖ How is knowledge contextualized?
- ❖ What are the critical features?
- ❖ A *Vombatus ursinus* is a stocky, short-legged furry badger-like animal up to 4' long weighing 30-75 pounds.
