

Promoting 21st Century Scholarly Communication: The Role of Institutional
Repositories in the Open Access Movement

University of Hong Kong, May 17-18, 2007

Case Studies of the Integration of Institutional Repositories and Open Access journals

Leslie Chan
University of Toronto Scarborough
Chan@utsc.utoronto.ca

Overview

- Changing landscape of scholarly communication
- Open Access and Public Policy
- International and Canadian context
- IR and what it is
- The multiple uses of IR
- Benefits

Changing landscape of scholarly communication

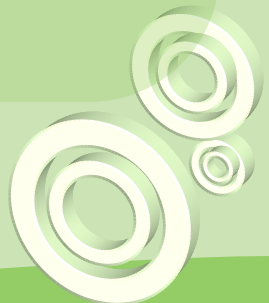

- Print to electronic, retro-digitization etc.
- Access online resources from the desktop
- Open Access
- Google is king?

But Price and Permission
Barriers are still significant

What authors need

- Support for new modes of authorship and dissemination
- Data base storage
- Media integration
- Long term archiving
- Linking research and teaching
- Support for alternative forms of evaluation and reward

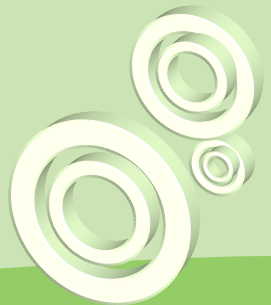

Problems

- Researchers/Authors : their work are not as widely disseminated -> lost of research impact
- Researchers/Readers: unable to build on prior research because of the fragmented nature of the literature
- Libraries - unable to provide users with their needs
- Universities - poor stewardship of their faculty's intellectual output
- Funders - not sure what they have funded and the return on investment

These problems are particularly acute in developing countries

Opportunities created through Open Access

- Integrate knowledge from diverse geographic locations and sources
- Infrastructure for an expanded view of scholarly communication
- New services and business models
- Implementation of Semantic Web technologies

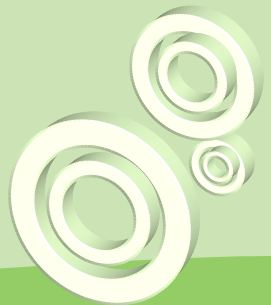

❖ Emergence of E-Science (UK), E-Research (Australia), Cyberinfrastructure (US)

❖ Large scale data, computing intensive analysis, networked communication

Not just for the sciences, but also for the humanities and social sciences

Great opportunity for developing countries to participate in global knowledge exchange

International Support

- BOAI, February 2002
- Bethesda Statement, April 2003
- Berlin Declaration, October 2003 & May 2004, February 2005, March 2006
- Wellcome Trust, October 2003, May 2005
- UK Parliamentary Inquiry, 2004
- Ukrainian Cabinet of Ministers, 2005
- Research Councils UK, 2006
- Academy of Sciences of South Africa, 2006
- US Public Access to Federally Funded Research Act of 2006 (to be re-introduced in 2007)
- European Commission Communiqué, 2007

A Vision Of The Future

What Would A 21st Century Research Communication System Look Like?

Goal: Maximizing the impact of research knowledge for society

Realized By: Providing pathways (through individual & institutional connections) for the rapid circulation, effective management & preservation of data, information & knowledge

Guiding Principles:

- All nations should have the capacity to access & contribute to the vitality of the system
- Open access to data, information & knowledge

Office of the
National Science Advisor

Bureau du
Conseiller national des sciences

Canada

Arthur J. Carty

National Science Advisor to the Prime Minister

International Association of Technological University Libraries, Quebec 31 May 2005

Canada's responses

- Canadian Institute of Health Research (CIHR)
- Social Science and Humanities Research Council of Canada (SSHRC)
- Canadian Federation for the Humanities and Social Sciences (CFHSS)
- Canadian Association of Research Libraries (CARL)
- National Research Council (NRC)?
- Natural Sciences and Engineering Research Council of Canada (NSERC)?

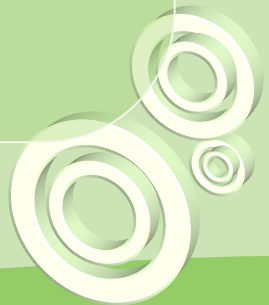

How to achieve OA

- Open Access Journals
 - Different funding models
- Open Access Repositories
 - Author self-archiving in:
 - Institutional
 - Subject-base
 - Centralized repositories

Institutional Repositories are

- Institution-based
- Capture and make accessible an organization's intellectual output
- A set of scholarly communication services
- Cumulative & perpetual
- Should be technically open & interoperable (e.g. OAI)

Welcome to the University of Toronto's Research Repository, T-Space!

T-Space showcases and preserves the scholarly work of U of T faculty. T-Space is faculty space, established by the Library to support the dissemination of knowledge by the University community. For more information take our [guided tour](#).

The Office of International Surgery (OIS) at the University of Toronto was established by the Department of Surgery to foster surgical education and research for development. It is situated within the largest academic Department of Surgery in North America and through its collaboration with the Centre for International Health in the Faculty of Medicine can draw on expertise in health related fields from across the University.

Canadian Review of Physical
Anthropology

L' Association
Canadienne
D'Anthropologie
Physique

Canadian Review of Physical Anthropology Revue Canadienne d'Anthropologie Physique

The Canadian Review of Physical Anthropology / Revue Canadienne d'Anthropologie Physique was published by the Canadian Association for Physical Anthropology between 1979 and 1988. The issues of this journal are reproduced as PDF files here – but the sequence of volume numbers and journal titles does require some explanation.

Volumes 1, 2 and 3 were published in 1979, 1980 and 1981 respectively. There was a hiatus in publication for a few years until 1985 and 1986 when the Review was published with the Canadian Journal of Anthropology. Volume 4 #1-2 of the Review was published with Volume 4 #2 of CJA and Volume 5 #2 was published with Volume 5 #2 of CJA. The editorial in Volume 6 #1 of the Review noted that the labeling of Volume 5 as #2 was an error, and it should have read #1-2. CAPA published the Review on its own again in 1987 and 1988 for Volume 6 #1 and #2 respectively. Volume 6 #2 was the last issue of the Review.

Volume 3 #2 of the Canadian Journal of Anthropology (1983) – the "Proceedings of A Symposium on Human Evolution" – can also be found here as a PDF file. This issue of CJA was not an official collaboration between CJA and CAPA, but Dr. Sperber the issue editor, is an active CAPA member and the content is certainly relevant to CAPA members. It is reproduced here with the permission of Dr. Sperber and the Department of Anthropology at the University of Alberta.

on Human Evolution

(Canadian Journal of
Anthropology)

Bioline International is a not-for-profit electronic publishing service committed to providing open access to quality research journals published in developing countries. BI's goal of reducing the South to North knowledge gap is crucial to a global understanding of health (tropical medicine, infectious diseases, epidemiology, emerging new diseases), biodiversity, the environment, conservation and international development. With peer-reviewed journals from Brazil, Cuba, India, Indonesia, Kenya, South Africa, Uganda, Zimbabwe and more to come, BI provides a unique service by making bioscience information generated in these countries available to the international research community world-wide.

Find out more about the:

- [Mandate and Organization of Bioline International](#)
- [Journals in the Bioline International system](#)
- [Bioline Partners](#)
- [Apply to join Bioline International](#)
- [Features and Added Services](#)
- [What's new at Bioline International](#)

Bioline International is managed by scientists and librarians. It is a collaborative initiative of the University of Toronto Libraries, Canada (management office), the Reference Center on Environmental Information, Brazil (host computer and software development) and Bioline/UK (liaison).

To Contact us, please email: Bioline.International@utoronto.ca

We look forward to your comments about the journals in Bioline International and of our services.

OA Outcomes

- For Researchers
 - Maximize visibility and impact of one's research
 - Greater control of one's intellectual labour
 - Post-publication evaluation and impact
- For University
 - Promote institutional prestige
 - Better management of institutional output
- For Libraries
 - Lower cost for journals allow reinvestment in other resources
 - Allow customization of resources
- For Students
 - Access to greater variety of quality learning resources
- For funders
 - Ensure public access
 - Better return on investment when research is built upon

Conclusions

- Time to act now
- More research on researchers needed
- Both bottom-up (faculty-driven) and top-down (university and funding mandates) are needed
- Development of new tools for evaluation and quality assurance
- Think globally and act locally

Thank you!
